SPECIAL ISSUE

OPERATIONAL METHODS TO CHARACTERIZE SOIL BEHAVIOR IN SPACE AND TIME

1992 Conference of Working Group M/V of the International Society of Soil Science, Cornell University, Ithaca, NY, USA, July 26–29, 1992

Edited by

R.J. WAGENET[a] and J. BOUMA[b]

CONTENTS

Introduction vii
Soil behavior under field conditions: differences in perception and their effects on research
J. Bouma 1
Simulation modelling and soil behaviour
T.M. Addiscott 15
Visualizing soil behavior
S.D. DeGloria 41
Characterization of soil conditions at the field level for soil specific management
P. Robert 57
The leaching potential as a land quality of two Dutch soils under current and potential management conditions
M.J.D. Hack-ten Broeke, H.A.J. van Lanen and J. Bouma 73
Field scale variability of soil structure and its impact on crop growth and nitrate leaching in the analysis of fertilizing scenarios
P.A. Finke 89
The influence of soil type and cultivation system on the spatial distributions of the soil fauna and microorganisms and their interactions
H. Fromm, K. Winter, J. Filser, R. Hantschel and F. Beese 109
Field-scale solute transport — spatially interpolating the parameters of a transfer function model
J. Hosang 119
Space–time analysis of water status in a volcanic Vesuvian soil
V. Comegna and C. Vitale 135
Hydraulic variability in space and time in a dark red latosol of the tropics
K. Reichardt, O.O.S. Bacchi, M.d.l.M. Villagra, A.L. Turatti and Z.O. Pedrosa 159
Use of an inverse method and geostatistics to estimate soil hydraulic conductivity for spatial variability analysis
N. Romano 169

Evaluation of temporal, spatial, and tillage-induced variability for parameterization of soil infiltration
H.M. van Es 187
Applying one-dimensional deterministic chemical fate models on a regional scale
J.L. Hutson 201
Monitoring and prognosis of regional water and salt
L. Yunzhu, S. Yuanchun, L. Baoguo and L. Jinwen 213
A decision-support model for monitoring nutrient balances under agricultural land use (NUTMON)
E.M.A. Smaling and L.O. Fresco 235
Accounting for variability within map units when linking a pesticide fate model to soil survey
X. Foussereau, A.G. Hornsby and R.B. Brown 257
Optimizing land use distribution to minimize nutrient depletion: a case study for the Atlantic Zone of Costa Rica
J.J. Stoorvogel 277
Use of GIS and remote sensing for soil mapping and for locating new sites for permanent cropland — A case study in the "highlands" of northern Thailand
M. Liengsakul, S. Mekpaiboonwatana, P. Pramojanee, K. Bronsveld and H. Huizing 293
A world soils and terrain digital database (SOTER) — An improved assessment of land resources
L.R. Oldeman and V.W.P. van Engelen 309
Enhanced soils information systems from advances in computer technology
D.J. Ernstrom and D. Lytle 327
Application of agro-ecological concepts and hierarchy theory in the design of databases for spatial and temporal characterisation of land and soil
J. Dumanski, W.W. Pettapiece, D.F. Acton and P.P. Claude 343
Two alternative methods for evaluating regional crop yield potential in the European Community
C.A. van Diepen 359
Science and the crisis of the environment
D. Hillel 377
